

Can global businesses flourish in the desert heat?

World Trade Centre, Bahrain

Bahrain's World Trade Centre is a model of energy efficiency and intelligent infocomm technology with security infrastructure. To meet the demand for dynamic, cutting-edge workspaces, facility and resource management solutions were implemented – making high-speed, high-stake deals possible even in the sweltering heat.

When the Kingdom of Bahrain wanted proven solutions for its intelligent building, they chose to collaborate with Singapore-based infocomm company, NCS.

With a solid track record in delivering results, our Infocomm Singapore companies have innovative infocomm solutions and domain expertise to unlock opportunities for governments and businesses. More than that, we have improved the way people live, work and play. Infocomm Singapore, Innovations In Action.
